<i>x1</i>	Defines the leftmost bound of the area to be drawn.
<i>y1</i>	Defines the uppermost bound of the area to be drawn.
<i>width</i>	Defines the width of the bitmap to be drawn.
<i>height</i>	Defines the height of the bitmap to be drawn.
<i>colormap</i>	An array containing width*height entries of value 0 for pixel off or != 0 for pixel on.

The area with an upper left corner at (x1, y1) and lower right corner at (x2, y2) will be filled with color if fill>0 or the current contents of the area will be reversed if fill==0.

Parameters

<i>canvas</i>	A pointer to a g15canvas (p. 5) struct in which the buffer to be operated on is found.
<i>x1</i>	Defines leftmost bound of area to be filled.
<i>y1</i>	Defines uppermost bound of area to be filled.
<i>x2</i>	Defines rightmost bound of area to be filled.
<i>y2</i>	Defines bottommost bound of area to be filled.
<i>fill</i>	Area will be filled with color if fill != 0, else contents of area will have color values reversed.
<i>color</i>	If fill != 0, then area will be filled if color == 1 and emptied if color == 0.
